Chapter # 1

Be a Safe and Ethical

Computer User

Class: VI

Exercise: C

Question

Exercise D: Write a note on "Cyberbullying"

Answer:

Cyber Bullying involves posting hate comments on different websites and social networks, most usually by ordinary internet users. On a worse level, a cyber-bully, or someone who uses the internet to spread hate, will pull your legs by disgracing your nationality, race or religion using means like comments, photos or videos.

The best way to fight cyber bullying is to never give it any importance. Never respond to a hateful thing with hate. Never post indecent things yourself. When you do, you are inviting others to bully you or your ones.
